Introduces

FACTS LMS

We're excited to announce the debut of FACTS LMS (Learning Management System) at our school. The LMS will allow us to connect with students online, distribute materials, collect assignments, facilitate discussions, and assess progress while still syncing information to our SIS.

FACTS has created a short LMS Overview Video to give you an introduction to the system. [Click here](#) to watch it at your convenience. The password to access the video is **factslms** (case sensitive).

You can learn about how to log in and use the LMS by watching the LMS for Students video. [Click here](#) to watch it at your convenience. The password to access the video is **factslms** (case sensitive).
